

# FORGING FUTURES

## A GLOBAL EDUCATION- CLIMATE CAUCUS

### INVITATION

We are delighted to share an exclusive invite for you to attend the global education climate caucus, FORGING FUTURES, organized by the Global Partnership for Education (GPE) and Oxfam, in partnership with UNESCO Greening Education Partnership, UNHCR, Education Cannot Wait and University of Copenhagen.

Confirmed speakers include UN Special Envoy on Global Education Gordon Brown, Special Advisor to the UN Secretary General for Transforming Education Leonardo Garnier and CEO of Global Partnership for Education Laura Frigenti.

### WHEN:

9am-2pm CET, October 6th, 2023

### WHERE:

University of Copenhagen, Southern Campus

### WHAT:

Global Ministerial event with special announcements, exclusive Virtual Reality experience, high-level commitments and networking to progress the education-climate agenda ahead of COP28. Opening session led by Dan Jørgensen, Danish Minister for Development Cooperation and Global Climate Policy

## HOW TO SECURE YOUR PLACE:

Attendees are required to register for in-person attendance using [this registration form](#).

For online attendance, please sign up using [this registration form](#).

For any queries, please RSVP to this email address: [ClimateEducation@oxfam.dk](mailto:ClimateEducation@oxfam.dk).

Following the event, a workshop on next steps heading into the COP28 and youth and student activism will take place from 2pm to 4pm at University of Copenhagen, organized by Global Student Forum, Students Organising for Sustainability and Oxfam. To participate please RSVP to [ClimateEducation@oxfam.dk](mailto:ClimateEducation@oxfam.dk).

On the heels of the Africa Climate Summit in Kenya, Mock COP and the Malala Fund and the Center for Global Development event “Protecting Our Future Generations: Climate Change, Education, and Gender Perspectives” this dynamic event will bring together climate and education actors at the highest levels in a commitment to support and solve these dual challenges – the two greatest child rights crises of our time.

The event will be preceded by a youth and student summit in Copenhagen organized by Global Student Forum and Students Organising for Sustainability.

Without quality education for all, the number of deaths due to the climate will rise dramatically, communities will not adapt, and climate goals will continue to elude us. Conversely, investing seriously in transforming education systems is the greatest untapped resource in tackling the climate emergency.

We need to plan for a future where every child can continue to learn and where learning helps to save the planet.

We look forward to welcoming you for this very special event.

Further details will be shared with confirmed participants.
